Here's a little testimonial from me. Past two nights I have rubbed lavender onto the bottom of my 3 year old sons feet who can be a little monkey at bed time. Typical tricks you would expect to get out of bed....needing the toilet 5 times in one hour etc BUT the last two nights off to bed and strait to sleep like an angel. I was amazed and very very pleased 😊 😊 meaning I've had more time to get stuck in learning about this amazing business win win!!!

Why did I join doTerra? My story is one that is prob heard alot and like Peter Rea said last night on the webinar, you either join into it for the business point of view or because you like the products and used the products in the past so know them well and know how good they are. I will keep this short as I can but wanted to share with others, I have what is called Chronic Panic Disorder and with that chronic fatigue, I got diagnosed with this horrid condition about 6 and half years ago now, I would get roughly about 6-8 attacks per day, it was no fun at all and extremely terrifying so much so i have had ambulances out with expected heart attacks so not at all pleasant to go through, about 2 years ago now a good friend of mine asked me if i have ever tried essential oils, I was at a time in my life when i was willing to try anything for my attacks I was that desperate, he sent me some samples from doTerra's range and from USA, I started using "Breathe as that is what he reconmended to me at first, its been like a god send to me, when i would hyperventilate i would do my breathing exercises using breathe, this seriously calmed me down alot and i dont ever leave my home without it ever, I also started using peppermint for the bad headaches i would get just after my attacks and all i can say is its just one of those stunning products you naturally want to recommend as its so good, I first realised just how good the first time i got those little tingles on my forehead and my headache just disapeared.. I have many more stories to tell on other oils i have used but dont want this to be too long a read, to cut a long story short, I have always loved the oils since i started using them, I take medication for my CPD but the oils seriously help no end, I would recommend them to anyone and I cant wait to get started with my new doTerra business.

I hope others reading this can relate to me in some way and maybe you have also benefited from using the best essential oils in the world. I love them and always will.. My new business kit turned up today now its time to get some samples out there... Bye for now folks.

I must share something amazing with everyone! I know that dōTERRA essential oils are amazing, but I didn't know how AMAZING! Last night I started to feel unwell, horrible chesty cough and flu like symptoms. I really don't have time to be ill right now, so thought I'd try some oils internally. I grabbed a veggie capsule for the first time & added 2 drops of Lemon, 2 drops of Melaleuca NOT Eucalyptus, 2 drops of Breathe, 2 drops of Oregano and 2 drops of Frankincense for good measure. Sealed the capsule and took with a glass of water. This morning I felt so much better, no sore chest, no cough, just a few sniffles. I decided to take exactly the same again this morning. Tonight I feel absolutely fine, no symptoms whatsoever, but have taken another capsule to be sure. I cannot believe that we have such an amazing gift to share with others. dōTERRA is going to grow massively because everyone can benefit and will want to use the oils! C'mon guys find your own personal stories & start sharing with true passion

**Debbie** [redacted] Hi everyone, a little testimonial, we've just joined do TERRA and got our kit yesterday afternoon. Have tried BREATHE on my husband Pete, he suffers from allergic rhinitis and sounds like he has a cold most of the time, with congested nasal passages and chest. Couldn't believe the result from one drop on his hands and breathed in! He said his airways hadn't felt so clear in years. Also I've got a corn developing on a toe, it was throbbing this morning, a couple of drops of lavender eased it no end. Fab products - excited at the start of our journey! 😊

I have been suffering with sciatica for the last couple of days. When this flares up I normally take strong pain killers every four hours as I am in so much pain I can not leave the house or sleep. I have been using the deep blue drops topically and no pain killers at all and have been virtually pain free and able to still go to work. I also gave a sample to someone with back ache and a painful elbow and she also has stopped her painkillers. Wouldn't it be lovely to never take pain killers again !!!
